## **Creating A Dialectical Social:**

**Creating a Dialectical Social Science** I.I. Mitroff, R.O. Mason, 2012-12-06 The depth intensity and long standing nature of the disagreements between differing schools of social thought renders more critical than ever the treatment of dialectical reasoning and its relationship to the social sciences The nature of these disagreements are deeply rooted in fundamentally differing beliefs regarding among many things 1 the nature of man 2 the role of theory versus data in constructing social theories 3 the place and function of values versus facts in inquiry etc It has become more and more apparent that such fundamental differences cannot be resolved by surface appeals to rationality or to consensus Such for it is precisely the definitions of appeals are doomed to failure rationality and consensus that are at odds That is different schools not only have different definitions of rationality and consensus but different notions regarding their place and function within a total system of inquiry A dialectical treatment of conflicts is called for because such conflicts demand a method which is capable of recognizing first of all how deep they lie Secondly a method is demanded which is capable of appreciating that the various sides of the conflict fundamentally depend on one another for their very existence they depend in other words on one another not in spite of their opposition but precisely because of it

**Dialectical Social Science in the Age of Complexity** Ian Trevor King, 2001 This study places dialectical thinking theory and method on a solid scientific footing with respect to the contemporary sciences of holistic relationism and offers a competing even superior philosophy of social science to the mainstream version of positivistic behaviourism It also indicates ways in which a dialectical holistic relational social science will help to shape a more democratic humane style of politics and public policy It subjects mainstream social science to wholesale reorientation and in doing so offers a valid prescription for a post positivistic post behaviourist social science that is scientifically grounded
