Veselinova,2006 This book examines stem change in verb paradigms as in English go go PRESENT vs went go PAST a phenomenon referred to as suppletion in current linguistic theory The work is based on a broad sample of 193 languages and examines this long neglected phenomenon from a typological perspective In addition to identifying types of suppletion which occur cross linguistically the study brings to light areal patterns of the occurrence of suppletive forms in verb paradigms Several hypotheses as regards the diachronic development of suppletive forms are presented as well The author also seeks to explore the methodological issues of evaluating the frequency of linguistic features in large language samples by introducing a method of weighting languages according to their genetic relatedness All figures obtained in this way are compared to the proportions yielded by more familiar counting methods and the results and implications of the different procedures are compared and discussed throughout **Introduction to the Science of Language** Archibald Henry Sayce,1883
Introduction to the Science of Language A. H. Sayce,2019-07-23 First published in 1900 this is the second of two volumes of the magnum opus from pioneer assyriologist and linguist Rev Archibald Sayce and continues directly from the first providing an introduction to linguistic roots inflectional families of speech agglutinative incorporating polysynthetic and isolating languages comparative mythology the science of religion the origin of language and the relation of language to ethnology logic and education In it Sayce was the first to emphasize the principle of partial assimilation and the linguistic principle of analogy This 4th edition ten years after the first reflected on the limitations of science revealed since 1890 in an era when languages like other humanities subjects still idealised scientific approaches Archibald Henry Sayce was one of the

greatest comparative linguists of the time being proficient in Accadian Arabic Cuneiform Chinese Egyptian Greek Hebrew Hittite Japanese Latin Persian Phoenician Sanscrit and Sumerian He had a good knowledge of every Semitic and Indo European language and could write good prose in at least twenty languages Sayce s first major contribution to scholarship was a highly significant translation of an Accadian seal a bilingual text from which to translate cuneiform similar to the Rosetta Stone Here then no doubt the reader learns from a master of comparative linguistics

Competing Comparative Constructions in Europe Thomas Stolz,2013-10-24 This in depth areal typological study analyzes the grammatical means which are employed in the languages of Europe to express the comparative of inequality superiority The extant theories and hypotheses about the morphosyntactic structure and the cross linguistic distribution of construction types are reviewed The behavior of comparatives under the conditions of language contact is discussed Data from more than 170 standard and nonstandard varieties of European languages are scrutinized systematically The synchronic picture is complemented by a chapter on the diachrony of comparative constructions The European facts are compared to those of the geographically adjacent Asian and African regions It is argued that cross linguistic investigations must take account also of so called secondary options These secondary options suggest strongly that the supposedly dominant role of the particle comparative cannot be upheld for Europe Moreover only the secondary options allow us to draw isoglosses which cross the borders between Europe and Asia and Africa
