interconnected chapters that provides a coherent understanding of Michael Porter's contribution to the field of strategic management. It addresses key changes and challenges in the global business environment. The value chain concept has become highly applicable in both theory and practice. In the book, the authors offer an original interpretation of the Porter's research on strategic management in order to unravel or simplify his key theoretical concepts. It will be of interest to researchers, academics, practitioners, and students in the fields of strategic management and international business.

Public Regulation of Competitive Practices National Industrial Conference Board, 1929 *Theory of Urban Space Development* Jin Duan, 2024-08-29 This book is a systematic monograph on urban space development theory exploring the laws of urban space development and the basic principles of planning and design. It clarifies the connotation and methods of urban space development research, highlights the deep structure and four laws of urban space development, expounds the obvious characteristics of urban and regional forms, and discusses the interventional role of urban planning and the development mode of Chinese urban space. It also discusses the methodological change of modern urban design and forms the principles and core content of China's national spatial planning. Guided by the fundamental principles and methods of development theory, this book follows logical progression from concept to method, from deep structure to manifest form, from macro to micro, and from law to planning. By providing readers with a comprehensive and systematic urban space development research system, this book is a valuable read for both researchers and graduate students in urban studies and architectural design. The translation was done with the help of artificial intelligence. A subsequent human revision was done primarily in terms of content.
