**Design for Decision ; an Introduction to Statistical Decision-making** Irwin D. F. Bross,1965 Introductory Statistics Prem S. Tranter,2000 Recent years have seen massive changes in the tools and instrumentation available to chemists in the scale of databases linking the properties of pure materials solutions or other mixtures to molecular structure and in the sheer ability of chemists to collect data through automated data acquisition systems Despite these advances many chemists still apply only rudimentary data analysis techniques and remain unaware of the advances made in information extraction over the last decade or so This volume covers the principles of design and analysis in chemical research and development It is organised in chapters dealing with major activities and understanding is generated through large numbers of examples and practical applications relating to research and development chemistry Authors adopt a user friendly approach concentrating on principles and interpretation rather than formal derivation and proof A principal theme is that statistics and chemometrics which relies on statistics are essentially extensions of the logical processes used every day by chemists and that they bring greater understanding of problems more quickly and easily than purely intuitive methods Design and Analysis of Experiments, Introduction to Experimental Design Klaus Hinkelmann,Oscar Kempthorne,1994-03-22 Design and analysis of experiments Hinkelmann v 1 Introductory Statistics for Business ,2001 This south African text introduces learners to the basic concepts of commercial statistics and eases its way into more complicated topics Written in an easy to understand manner and following the principles of outcomes based education the book ensures that the learner first gains a solid foundation in the all important elementary concepts of statistics Back Cover Introductory Statistics, International Adaptation Prem S.
