considerations Up to date coverage of new technologies being implemented in senior living facilities New space
programming standards and sample programs Like every Building Type Basics book this conveniently organized quick
reference provides authoritative up to date information instantly and saves professionals countless hours of research

Design for Independent Living David Johannes Seidel, 2011 Therapeutic Social Space Design for Independent
Living Retirement Community Residents Nichole M. Campbell, 2011 *Design for Independent Living*, 1991 *Design for*
Independent Living David Johannes Seidel, 2010 **Homes for Our Old Age**, 2009 **Homes for Our Old Age** Great
Britain. Commission for Architecture and the Built Environment, 2009 *Architectures of Care* Brittany Utting, 2023-12-05
Drawing from a diverse range of interdisciplinary voices this book explores how spaces of care shape our affective material
and social forms from the most intimate scale of the body to our planetary commons Typical definitions of care center around
the maintenance of a livable life encompassing everything from shelter and welfare to health and safety Architecture plays a
fundamental role in these definitions inscribed in institutional archetypes such as the home the hospital the school and the
nursery However these spaces often structure modes of care that prescribe gender roles bodily norms and labor practices
How can architecture instead engage with an expanded definition of care that questions such roles and norms producing
more hybrid entanglements between our bodies our collective lives and our environments Chapters in this book explore
issues ranging from disabled domesticities and nursing unbuilding whiteness in the built environment practices and
pedagogies of environmental care and the solidarity networks within The Cloud Case studies include Floating University
Berlin commoning initiatives by the Black Panther party and hospitals for the United Mine Workers of America among many

other sites and scales of care Exploring architecture through the lenses of gender studies labor theory environmental justice and the medical humanities this book will engage students and academics from a wide range of disciplines
