Care in Technology Xavier Guchet, 2021-03-31 Today it is widely recognized that in order to meet environmental challenges it will not simply be enough to make our lifestyles greener also critical is putting an end to the modern conception of the human as master and possessor of nature However to bear fruit this change in anthropology must also be accompanied by a revision in our conception of technology Since the Enlightenment and the development of industrialization technology no longer seems to be subject to the guiding principles set by the Greeks prudence and the search for the right measure in all which leads to the care of beings and the world *Care in Technology* analyzes the historical changes that have led technology to become an unthinkable part of care and care an unthinkable part of technology It also establishes the conditions for care to once again become a regulatory principle of the activity of

engineers who design technology

The Design of Care Craig Bremner,Paul Rodgers,Giovanni Innella,Justin Magee,2026

Chronicles of Care: A Design History of the COVID-19 Virus Paul A. Rodgers,Fernando Galdon,Craig Bremner,2024-04-16
The Covid 19 crisis and the designed interventions that the authors have catalogued in this book prove definitively that design does care The authors documented this as it evolved every day from the 1st January 2020 to 31st May 2020 inclusive Then they looked at all of this care and caring from the point of view of design and by the sheer volume of design interventions they have documented illustrate that design is good in a crisis What the Covid 19 pandemic illustrated is that for the first time in modern history capital was totally irrelevant Money could not save your life Only design could Rapidly designed masks shelters hospitals instructional posters infographics dashboards respirators sanitisers virtual and local communities emerged to save us From January 2020 design became king The Covid 19 global pandemic presented an ontological reality design is more than margins or profit In fact design became extremely valuable when it stopped concentrating on those things and started to care about peoples lives This brief episode in history is still repositioning the status of design and reconfiguring its signifier from consumption to care The contents of this book cover the outbreak lockdown and the beginning of the reopening in the UK In between the book

functions as a history of pandemic crisis design interventions As such it is a research in the moment project where we have illustrated our thoughts and insights in tables charts and diagrams We have accepted all design interventions as valid and given them the same role and status by presenting each of them in a standard format No curation No selection No position The task of critical analysis must follow perhaps by us certainly by others
