Managing Large Research and Development Programs Henry W. Lane, Rodney G. Beddows, Paul R. Lawrence, 1982-06-30 Today s society sorely needs the innovations that are the intended fruit of large institutions research and development programs Yet to date the complicated process of R D management holds a track record that is far from impressive The task of R D managers is to channel and direct a complex process involving scientific political and social groups with differing values and goals And this must be done in such a way as to preserve an environment that allows science to pursue knowledge efficiently but also insures that the goals pursued are relevant to pressing social needs To discern why some programs are more successful in this task than others the authors have studied nine R D programs in two large organizations both of which are embedded in complex social economic and political environments These programs are THE NATIONAL INSTITUTE OF HEALTH Artificial Heart Research Cancer Chemotherapy Research Sudden Infant Death Syndrome Research Sickle Cell Anemia Research Genetics Research THE AMERICAN TELEPHONE AND TELEGRAPH COMPANY The No 4 Electronic Switching System The High Capacity Mobile Telephone Millimeter Wavelength Transmission The D 4 Digital Channel Bank The study not only examines the organizational and technical aspects of each program but also considers their political environments The authors also explore the historical origins of each program and its evolution seeking in depth understanding through interviews with relevant actors and analyses of documentary evidence of decisions events and the paths to them The cases selected bring out the important dimensions and issues in both public and private R D management The authors have illuminated logical patterns in the management process that can produce desired results The book features a model that will prove useful to managers and students of research and development
