Comparative Reception Of Relativity:

The Comparative Reception of Relativity T.F Glick,2012-12-06 The present volume grew out of a double session of the Boston Colloquium for the Philosophy of Science held in Boston on March 25 1983 The papers presented there by Biezunski Glick Goldberg and Judith Goodstein offered both sufficient comparability to establish regularities in the reception of relativity and Einstein's impact in France Spain the United States and Italy and sufficient contrast to suggest the salience of national inflections in the process The interaction among the participants and the added perspectives offered by members of the audience suggested the interest of commissioning articles for a more inclusive volume which would cover as many national cases as we could muster Only general guidelines were given to the authors to treat the special or general theories or both hopefully in a multidisciplinary setting to examine the popular reception of relativity or Einstein's personal impact or to survey all these topics In a previous volume on the comparative reception of Darwinism one of us devised a detailed set of guidelines which in general were not followed In our opinion the studies in this collection offer greater comparability no doubt because relativity by its nature and its complexity offers a sharper more easily bounded target As in the Darwinism volume this book concludes with an essay intended to draw together in comparative perspective some of many themes addressed by the participants

Loving Faster than Light Katy Price,2024-05-31 In November 1919 newspapers around the world alerted readers to a sensational new theory of the universe Albert Einstein's theory of relativity Coming at a time of social political and economic upheaval Einstein's theory quickly became a rich cultural resource with many uses beyond physical theory Media coverage of relativity in Britain took on qualities of pastiche and parody as serious attempts to evaluate Einstein's theory jostled with jokes and satires linking relativity to everything from railway budgets to religion The image of a befuddled newspaper reader attempting to explain Einstein's theory to his companions became a set piece in the popular press *Loving Faster than Light* focuses on the popular reception of relativity in Britain demonstrating how abstract science came to be entangled with class politics new media technology changing sex relations crime cricket and cinematography in the British imagination during the 1920s Blending literary analysis with insights from the history of science Katy Price reveals how cultural meanings for Einstein's relativity were negotiated in newspapers with differing political agendas popular science magazines pulp fiction adventure and romance stories detective plots and esoteric love poetry *Loving Faster than Light* is an essential read for anyone interested in popular science the intersection of science and literature and the social and cultural history of physics

young man with his family in Lombardy Pavia and Milan the texts of three lectures delivered by Einstein in Italian in October 1921 in Bologna at the invitation of the mathematician Federigo Enriques the only lectures he held in Italy the correspondence with Enriques and other Italian intellectuals together with the letter that Einstein sent in 1931 to the Minister of Justice Alfredo Rocco to try to avoid the infamy of the oath of allegiance to the fascist regime imposed by Mussolini on university professors The book closes with some writings on relativity from 1907 to 1914 Einstein Abraham Corbino Castelnuovo and the 1920s debate between pro relativists and anti relativists published in the international journal *Scientia* founded in 1907 by Enriques

The Religion of Life Sarah Walsh, 2022-01-25 The Religion of Life examines the interconnections and relationship between Catholicism and eugenics in early twentieth century Chile Specifically it demonstrates that the popularity of eugenic science was not diminished by the influence of Catholicism there In fact both eugenics and Catholicism worked together to construct the concept of a unique Chilean race *la raza chilena* A major factor that facilitated this conceptual overlap was a generalized belief among historical actors that male and female gender roles were biologically determined and therefore essential to a functioning society As the first English language study of eugenics in Chile The Religion of Life surveys a wide variety of different materials periodicals newspapers medical theses and monographs produced by Catholic and secular intellectuals from the first half of the twentieth century What emerges from this examination is not only a more complex rendering of the relationship between religion and science but also the development of White supremacist logics in a Latin American context
