Comparative Chukotko-Kamchatkan Dictionary:

Comparative Chukotko-Kamchatkan Dictionary Michael Fortescue, 2011-12-22 This volume is the first comprehensive comparative dictionary to cover the whole of the Chukotko Kamchatkan family The genealogical status of this family whether from a common source or due to convergence has long been controversial but its coherence as a family can now be taken as proven Its geographical position between Siberia and northernmost America renders it crucial in any attempt to relate the languages and peoples of these large linguistic regions The dictionary consists of cognate sets arranged alphabetically according to reconstructed proto forms and covers all published lexical sources for the languages concerned plus a good deal of unpublished material The criterion for setting up Proto Chukotian sets is the existence of clear cognates in at least two of the four languages Chukchi Koryak Alutor and now extinct Kerek and for Proto Chukotko Kamchatkan sets cognates in at least one of these plus Itelmen Internal loans between the two branches of the family are indicated this is particularly important in the case of the many loans from Koryak to modern western Itelmen Proto Itelmen sets without clear cognates in Chukotian are listed separately without reconstructions The data is presented in a reader friendly format with each set divided into separate lines for the individual languages concerned and with a common orthography for all reliable modern forms given as full word stems not just roots The introduction contains information on the distribution of the individual languages and dialects and all sound correspondences relating them plus a sketch of what is known of their pre historical background Inflections and derivational affixes are treated in separate sections and Chukchi and English proto form indexes allows multiple routes of access to the data A full reference list of sources is included Comparative Chukotko-Kamchatkan dictionary with inflectional paradigms Michael Fortescue, 2002 *Comparative Wakashan Dictionary* Michael D. Fortescue, 2007 *A typology of questions in Northeast Asia and beyond* Andreas Hölzl, 2018-08-29 This study investigates the distribution of linguistic and specifically structural diversity in Northeast Asia NEA defined as the region north of the Yellow River and east of the Yenisei In particular it analyzes what is called the grammar of questions GQ i e those aspects of any given language that are specialized for asking questions or regularly combine with these The bulk of the study is a bottom up description and comparison of GQs in the languages of NEA The addition of the phrase and beyond to the title of this study serves two purposes First languages such as Turkish and Chuvash are included despite the fact that they are spoken outside of NEA since they have ties to or even originated in the region Second despite its focus on one area the typology is intended to be applicable to other languages as well Therefore it makes extensive use of data from languages outside of NEA The restriction to one category is necessary for reasons of space and clarity and the process of zooming in on one region allows a higher resolution and historical accuracy than is usually the case in linguistic typology The discussion mentions over 450 languages and dialects from NEA and beyond and gives about 900 glossed examples The aim is to achieve both a cross linguistically plausible typology and a maximal resolution of the linguistic diversity of Northeast Asia The

Language of the Inuit Louis-Jacques Dorais, 2014-08-01 The culmination of forty years of research The Language of the Inuit maps the geographical distribution and linguistic differences between the Eskaleut and Inuit languages and dialects Providing details about aspects of comparative phonology grammar and lexicon as well as Inuit prehistory and historical evolution Louis Jacques Dorais shows the effects of bilingualism literacy and formal education on Inuit language and considers its present status and future An enormous task masterfully accomplished The Language of the Inuit is not only an anthropological and linguistic study of a language and the broad social and cultural contexts where it is spoken but a history of the language s speakers

Language Relations Across The Bering Strait Michael Fortescue, 1998-11-01 In building up a scenario for the arrival on the shores of Alaska of speakers of languages related to Eskimo Aleut with genetic roots deep within Sineria this book touches upon a number of issues in contemporary historical linguistics and archaeology The Arctic gateway to the New World by acting as a bottleneck has allowed only small groups of mobile hunter gatherers through during specific propitious periods and thus provides a unique testing ground for theories about population and language movements in pre agricultural times Owing to the historically attested prevalence of language shifts and other contact phenomena in the region it is arguable that the spread of genes and the spread of language have been out of step since the earliest reconstructable times contrary to certain views of their linkage Proposals that have been put forward in the past concerning the affiliations of Eskimo Aleut languages are followed up in the light of recent progress in reconstructing the proto languages concerned Those linking Eskimo Aleut with the Uralic languages and Yukagir are particularly promising and reconstructions for many common elements are presented The entire region Great Beringia is scoured for typological evidence in the form of anomalies and constellations of uncommon traits diagnostic of affiliation or contact The various threads lead back to mesolithic times in south central Siberia when speakers of a Uralo Siberian mesh of related languages appears to have moved along the major waterways of Siberia Such a scenario would account for the present distribution of these languages and the results of their meeting with remnants of earlier linguistic waves from the Old World to the New

Polysemy, Diachrony, and the Circle of Cognition Michael Fortescue, 2021-01-25 Verbs of mental states or activity constitute a subject of considerable interest to both Cognitive Linguistics and Linguistic Typology They promise to open a window on the invisible workings of the mind while at the same time displaying a wide variety of historical sources across languages In this book Michael Fortescue presents an innovative approach to the semantics and diachronic source of cognitive verbs across a representative array of the world s languages The relationship among the cognitive verbs of individual languages is essentially one of metonymy and the book investigates in detail the specific metonymic relationships involved as revealed largely by the polysemous spread of word meanings The data is projected against a circular map of interrelated cognitive categories

Orientation Systems of the North Pacific Rim Michael Fortescue, Michael D. Fortescue, 2011 *Orientation Systems of the North Pacific Rim* is an extension of the author s earlier volume *Eskimo*

Orientation Systems also published in the series Monographs on Greenland Meddelelser om Gronland Man Society 1988 This time it covers all the contiguous languages and cultures across the northern Pacific rim from Vancouver Island in Canada to Hokkaido in northern Japan plus the adjacent Arctic coasts of Alaska and Chukotka These form a testing ground for recent theories concerning the nature and classification of orientation systems and their shared frames of reference in particular the many varieties of landmark systems typifying the Arctic and sub Arctic Despite the wide variety of languages spoken here all of them endangered there is much in common as regards their overlapping geographical settings and the ways in which terms for orientation within the microcosm the house and within the macrocosm the surrounding environment mesh throughout the region This is illustrated with numerous maps and diagrams from both coastal and inland sites Attention is paid to ambiguities and anomalies within the systems revealed by the data as these may be clues to pre historic movements of the populations concerned from a riverine setting to the coast from the coast to inland or more complex successive displacements Cultural factors over and beyond environmental determinism are discussed within this broad context
