Bergesen,Edith Kurzweil,2013-01-11 First published in 1984 Cultural Analysis is a systematic examination of the theories of culture contained in the writings of four contemporary social theorists Peter L Berger Mary Douglas Michel Foucault and Jürgen Habermas This study of their work clarifies their contributions to the analysis of culture and shows the converging assumptions that the authors believe are laying the foundation for a new approach to the study of culture The focus is specifically on culture a concept that remains subject to ambiguities of treatment and concentrates on questions concerning the definition and content of culture its construction its relations with social conditions and the manner in which it may be changing The book demonstrates how these writers have made strides towards defining culture as an objective element of social interaction which can be subjected to critical investigation *Cross-Cultural Analysis* Michael Minkov,2012-06-05 Cross Cultural Analysis is the sequel to *Culture's Consequences* the classic work published by Geert Hofstede one of the most influential management thinkers in today's times Hofstede's original work introduced a new research paradigm in cross cultural analysis studying cultural differences through nation level dimensions complex variables defined by intercorrelated items This paradigm has been

subsequently used by hundreds of prominent scholars all over the world and has produced solid results This new text takes the next step It critically examines in one comprehensive volume the current prevalent approaches to cross cultural analysis at the level of nations that have been developed since Hofstede s work offering students and researchers the theoretical and practical advantages and potential pitfalls of each method The book is structured into four distinct parts Parts I and II focus on the main theoretical and statistical issues in cross cultural analysis using Hofstede s approach and the different research methods now associated with it Part II consists of presentations of all well known and some lesser known large scale cross cultural studies since Hofstede s work that have explained cross cultural variation in terms of dimensional models Part III summarizes the main conclusions to be drawn from the presentations in Part II and I explains how the proposed models have contributed to our practical understanding of cross cultural diversity
