Mastering Fashion Styling Jo Dingemans, 1999-11-11 Fashion is a very popular subject among young people. Any course with fashion as a prefix attracts lots of students. Despite this, many prospective students and people have little idea what jobs in the fashion industry entail. Fashion Styling is one of the least well-researched areas in fashion colleges. The emphasis is put on the end result, i.e. visual imagery, rather than the process of creating it. This how-to book provides an insight into the processes you have to follow to work in this area, be it editorial, commercial, or show styling. It includes an eight-week introductory programme to the subject and projects whereby students can simulate professional practice and learn the techniques and skills necessary for a career in styling. At the end of the book, there is a source directory, a glossary of terms, and a bibliography which provide reference points for further research and study.
