Creative Choice In Hypnosis:

Creative Choice in Hypnosis Milton H. Erickson, 1992 Volume IV takes the reader on a journey that recaptures his evolution of the therapeutic double bind from a technique based on an authoritarian concept of illusory choice to a modern vision of the double bind as a free choice among comparable alternatives *Creative Choice in Hypnosis* Milton Erickson, Agnes Rossi, 1998

The Seminars, Workshops and Lectures of Milton H. Erickson Milton H. Erickson, M.D., 1998-11-13 More than any other individual Milton Erickson has been responsible for shaping the modern view of hypnosis His great contribution came from his ability to locate an individual's inner resources for coping creatively with the real problems of everyday life Erickson himself endured two bouts of polio and was in a wheelchair throughout much of his later life He learned to use the healing methods of self hypnosis to deal with his handicaps and uncover ways of experiencing living at more profound levels His delight in teaching these methods of self healing are clearly shown in these transcriptions of his seminars workshops and lectures Volume IV explores some important questions through a presentation never before published of Erickson's own hypnotic workshops and demonstrations is hypnosis a process of manipulation or facilitation does the hypnotherapist control people does the hypnotherapist simply give people permission to heal themselves The authoritarian permissive paradox of hypnotherapy is most evidenced in Erickson's use of the double bind Volume IV takes the reader on a journey that recaptures his evolution of the therapeutic double bind from a technique based on *Creative Choice in Hypnosis: the Seminars, Workshops, and Lectures of Milton H. Erickson*, 1992 *Creative Brainstorms* Russell R. Monroe, 1992 *Creative Mastery in Hypnosis and Hypnoanalysis* Margot L. Fass, Daniel Brown, 2013-10-31 The scope of Erika Fromm's profound contributions to the clinical and research literature in hypnosis and related areas is reflected in this volume which consists of chapters written by those who have worked closely with the noted psychologist and or have been significantly influenced by her The subject matter presented here ranges from detailed accounts and personal observations relating to Fromm's distinguished career to some very new and valuable data on the psychophysiological correlates of hypnosis the phenomenology of self hypnosis and an integrative model for short term therapy Several extensions of clinical technique for the treatment of trauma and severe psychopathology are also discussed Professional therapists with an interest in personal growth self awareness and creative mastery whether or not they already have an interest in hypnosis will derive significant benefits from this book Readers who have previously eschewed hypnosis may find that this volume stimulates an interest that enriches their clinical practice and or research
