Bully For Brontosaurus:

Bully for Brontosaurus Stephen Jay Gould, 2010-11-29 Provocative and delightfully discursive essays on natural history Gould is the Stan Musial of essay writing He can work himself into a corkscrew of ideas and improbable allusions paragraph after paragraph and then uncoiling hit it with such power that his fans know they are experiencing the game of essay writing at its best John Noble Wilford New York Times Book Review Bully for Brontosaurus P. Goulet, 1991 *Stephen Jay Gould* Warren D. Allmon, Patricia Kelley, Robert Ross, 2009 Considered by many during his lifetime as the most well known scientist in the world Stephen Jay Gould left an enormous and influential body of work A Harvard professor of paleontology evolutionary biology and the history of science Gould provided major insights into our understanding of the history of life He helped to reinvigorate paleontology launch macroevolution on a new course and provide a context in which the biological developmental stages of an organism s embryonic growth could be integrated into an understanding of evolution This book is a set of reflections on the many areas of Gould s intellectual life by the people who knew and understood him best former students and prominent close collaborators Mostly a critical assessment of his legacy the chapters are not technical contributions but rather offer a combination of intellectual bibliography personal memoir and reflection on Gould s diverse scientific achievements The work includes the most complete bibliography of his writings to date and offers a multi dimensional view of Gould s life work not to be found in any other volume The Other Side of the Scopes Monkey Trial Jerry Bergman, 2023-10-26 The enormous amount of literature on the Scopes Trial focuses on the religious elements of the trial It almost totally ignored the importance of racism as taught in the text that Scopes used to teach biology Bryan was not concerned about evolution in general but specifically human evolution He believed that Darwin s theory as applied to humans encouraged the oppression of certain oppressed groups Taking evolution s philosophy to its logical conclusion meant justifying survival of the fittest in social matters This philosophy he learned from his extensive reading about WWI was a major factor influencing the Germans to fight in the first World War Furthermore Bryan believed the citizens of Tennessee had a right to determine what their children were taught in the public schools Another fact that is rarely mentioned is the main fossil evidence cited in the trial documents and the press in support of human evolution has been discredited by evolutionists including Neanderthal man Piltdown man Java man and Nebraska man Scopes was not a biology teacher but rather taught math His college degree was not in biology but law He was not put on the stand to testify in his trial probably because he never taught evolution and could not honestly answer questions about teaching it This book covers the so called trial of the century telling the real story of a sham brought on by the ACLU to further their political and anti Christian goals *Bringing Fossils To Life: An Introduction To Paleobiology* Donald R. Prothero, 2004 This is the first text to combine both paleontology and paleobiology Traditional textbooks treat these separately despite the recent trend to combine them in teaching It bridges the gap between purely theoretical paleobiology and purely descriptive invertebrate paleontology books

The text is targeted at undergraduate geology and biology majors with the emphasis on organisms rather than dead objects to be described and catalogued Current ideas from modern biology ecology population genetics and many other concepts will be applied to the study of the fossil record **Bringing Fossils to Life** Donald R. Prothero,1998 Would you like to go beyond a focus on taxonomy and anatomy of major phyla of fossil invertebrates and include some of the exciting ideas of paleobiology This book by noted author Donald R Prothero is the first to combine paleobiology with paleontology topics Written in a manner that will not intimidate this is an accessible text for students with limited backgrounds in geology or biology Current ideas from modern biology ecology population genetics and many other concepts will be applied to the study of the fossil record **Chapter One** ,1993 **Natural History** ,1999 Recent Publications in Natural History ,1991

The Full Mountie Warren Clements,2003 Selected contributions to the weekly Globe challenge with cartoons and introductions to each section by the column s editor Warren Clements **The Creation/Evolution Controversy** Kary D. Smout,1998-10-28 This rhetorical study of the various language strategies and competing worldviews involved in the 140 year argument between Biblical creationists and Darwinian evolutionists focuses on the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial When Darwin published his Origins of Species in 1859 he initiated a debate about the origin of human life and the role of God in human affairs scarcely equalled in world history Smout traces the response of Biblical creationists to Darwinian evolutionists Looking carefully at the stories told and the tactics used by both sides he analyzes all available accounts of the original debate culminating in the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial Professor Smout argues that both sides in the controversy use various language strategies to persuade the culture as a whole to see the world that they see and to enact their position as public policy As Smout illustrates the problem is that both sides rely on an inadequate conception of language as a namer of timeless realities rather than as an instrument used by human communities to achieve their goals He attempts to articulate a better view of language and to show how it might help solve intractable arguments such as this He argues that we should see language as a tool that shapes what we see and definitions of terms as political acts rather than statements of fact made by disciplinary experts An important analysis for students and scholars in rhetoric history religion and sociology **Organisations and Institutions** Michael Rowlinson,1997 Organisations and Institutions is a critical introduction to organisational economics It examines the threat to sociology from the imperialist expansion of economics and the relative importance of efficiency and power in analysing organisations These are related to two major issues in social science firstly the organisation of work and secondly the separation of ownership from control It is essential reading for those studying organisation theory sociology and economics and who want to learn more about the tensions between their disciplines **The Darwin Wars** Andrew Brown,1999 This is an account of neo Darwinist theories including the influential Selfish Gene theory and the misunderstandings they provoke Divided between Dawkinsians and Gouldians

these theories are explained and evaluated showing the profound impact they have had on beliefs and culture Civil Moral Language and the Assurance of Religious Tolerance P. Lance Ternasky,1994 **Booklist's Guide to the Year's Best Books** Bill Ott,1992 Platypus Ann Moyal,2001 story of a biological riddle that confounded scientists for nearly ninety years challenging theories of creationism evolution and the classification of species along the way Jacket **Born Under a Bad Sky** Jeffrey St. Clair,2008 Environmental muckraking by one of the America s most acclaimed radical journalists **Rocky Mountain Mineral Law Institute** Rocky Mountain Mineral Law Institute,1994 **Environment & Planning A.** ,1994-07 **New Scientist and Science Journal** ,1995
