Advances In Software Tools For Scientific Computing:

Advances in Software Tools for Scientific Computing Hans P. Langtangen, Are M. Bruaset, Ewald Quak, 2012-12-06 To make full use of the ever increasing hardware capabilities of modern computers it is necessary to speedily enhance the performance and reliability of the software as well and often without having a suitable mathematical theory readily available. In the handling of more and more complex real life numerical problems in all sorts of applications a modern object oriented design and implementation of software tools has become a crucial component. The considerable challenges posed by the demand for efficient object oriented software in all areas of scientific computing make it necessary to exchange ideas and experiences from as many different sources as possible. Motivated by the success of the first meeting of this kind in Norway in 1996 we decided to organize another International Workshop on Modern Software Tools for Scientific Computing often referred to as SciTools 98. This workshop took place in Oslo Norway September 14-16 1998. The objective was again to provide an open forum for exchange and discussion of modern state of the art software techniques applied to challenging numerical problems. The organization was undertaken jointly by the research institute SINTEF Applied Mathematics the Departments of Mathematics and Informatics at the University of Oslo and the company Numerical Objects AS.

Modern Softwaretools For Scientific Computing Erlend Arge, Are Magnus Bruaset & Hans Petter Langtangen, 2004-01-01 This book surveys some recent advances in the development of software tools for scientific computing. Presented here are 17 carefully selected and referred chapters originally presented at the SciTools Workshop in Oslo Norway. The chapters emphasize the design of large software codes computational efficiency object oriented programming in scientific computing.
