

Plucking the Strings

Many keyboard instruments have strings. One way of playing strings is called plucking. Many instruments, such as the harp or the lute, need to be played by plucking. Today, the harp, guitar, viola and double bass are all instruments that can be played by plucking.

Listen To It

Listen to 'Garden of Earthly Delights' by Johann Sebastian Bach.

How does plucking affect the sound of the harp? Listen to the way the music sounds!

Remember

In the 18th century, an instrument called the harpsichord became very popular. How did it work?

- It combined a keyboard and the idea of plucking strings to create instruments.
- When the keys on the keyboard were played, a string on the instrument was plucked to play a note.

The First Pianos

The piano combined the features of the harpsichord with the keyboard of the harpsichord. Instead of plucking strings, the new instrument hit the strings to create the different notes.

The first piano was invented at the beginning of the 18th century by Bartolomeo Cristofori.

Listen To It

Listen to 'Garden of Earthly Delights' by Jean-Baptiste Lully. How does the sound of the piano affect the mood of the music?

How is the piano sound different from other piano pieces you may know?

In 1709, Cristofori invented the first ever piano of mass production for the piano.
