JEBPS Vol 16-N1 Journal of Evidence-Based Practices for Schools, 2017-07-14 The Journal of Evidence Based Practices for Schools is a leader in publishing research to practice articles for educators and school psychologists *Psychology, Eighth Edition in Modules* David G. Myers, 2007 This modular version of Myers's full length text Psychology reflects the author's research supported belief that many students learn better using a text comprised of brief modules as opposed standard length chapters Psychology Eighth Edition in Modules breaks down the 18 chapters of Psychology into 58 short modules retaining that acclaimed text's captivating writing superior pedagogy and wealth of references to recent cutting edge research The modular version has its own extensive media and supplements package with content organized to match its table of contents Handbook of Creativity John A. Glover, Royce R. Ronning, Cecil R. Reynolds, 2013-03-09 The motivation

underlying our development of a handbook of creativity was different from what usually is described by editors of other such volumes Our sense that a handbook was needed sprang not from a deluge of highly erudite studies calling out for organization nor did it stem from a belief that the field had become so fully articulated that such a book was necessary to provide summation and reference Instead this handbook was conceptualized as an attempt to provide structure and organization for a field of study that from our perspective had come to be a large scale example of a degenerating research program see Brown Chapter 1 The handbook grew out of a series of discussions that spanned several years At the heart of most of our interactions was a profound unhappiness with the state of research on creativity Our consensus was that the number of good works published on creativity each year was small and growing smaller Further we could not point to a journal text or professional organization that was providing leadership for the field in shaping a scientifically sound framework for the development of research programs in creativity At the same time we were casting about for a means of honoring a dear friend E Paul Torrance Our decision was that we might best be able to honor Paul and influence research on creativity by developing a handbook designed to challenge traditional perspectives while offering research agendas based on contemporary psychological views

Principles of Psychology Jacob Robert Kantor, 1924 Originally published in 1924 this book as the title suggests provides an overview of the principles of psychology Written at a time when psychology was a youthful science and the debate over the field's status as a natural science or even as a science at all was relatively fresh Principles of Psychology represents a stock taking of sorts a survey of the ends achieved and the newer trends of development in psychological research The author's aim is to present and study psychological phenomena as actual observable events consisting of the responses of psychological organisms on the one hand and the stimulus objects or conditions which interact with them on the other By dispensing with animatistic conceptions and intangible psychic phenomena that previously dominated the field the author hopes to bolster psychology's position as a member of the family of natural sciences According to the author only by avoiding meticulously all powers or functions whether considered as psychic or biological which do not represent actual observable phenomena or interpretations derived from such observations can psychology as a science be erected upon a firm foundation It is to this end that the author presents 15 chapters on a wide range of topics that represent the core concepts and principles of psychology The Domain Method and Development of Psychology The Primary Data of Psychology The Psychological Individual or Personality The Psychological Organism or Personality in Action The Simpler or Foundation Behavior Segments The Nature of Basic Conduct and How it is Developed The Development and Operation of Complex Human or Societal Conduct Attention Behavior as the Actualization of Stimuli The Nature of Sensing and Perceiving Implicit Action as Responses to Absent Stimuli Objects Association as a Fundamental Type of Psychological Activity The Primary Internal Character of Feeling Reactions Knowing as Determining and Orientating Conduct The Nature of Volitional Conduct and finally The Integrative Nature of Habit Reactions PsycINFO Database Record c
