Bread Making Stanley P. Cauvain,2003 *Technology of Breadmaking* Stanley P. Cauvain,Linda S. Young,2007-05-20 To study breadmaking is to realize that like many other food processes it is constantly changing as processing methodologies become increasingly more sophisticated yet at the same time we realize that we are dealing with a foodstuff the forms of which are very traditional New ideas and raw materials are constantly being presented to bakers from wheat breeders millers and ingredient and equipment suppliers for their evaluation In addition there are on going changes in legislation and consumer demands To meet such pressures bakers must be able to better integrate their key raw material wheat flour with other ingredients and processing methods to deliver bread of the appropriate quality *Technology of Breadmaking* Second Edition sets out to identify and present the new knowledge

that has become available in last 10 years as well as update information Like the first edition it provides a useful tool to help bakers scientists and technologists to cope with those changes *Technology of Breadmaking* Stanley Cauvain,2015-02-17 This practical comprehensive guide illuminates all aspects of breadmaking to give bakers scientists technologists and students a thorough understanding of the many new developments shaping the industry This book bridges the gap between scientific and practical accounts by providing technical coverage of the complex processes that link together to make bread and fermented products Chapters cover the nature of bread products the role of the ingredients in determining their quality processing methods and their control and equipment functions Emphasis is on exploring the contributions of individual components and processing stages to final bread quality reviewing the current state of technical knowledge on breadmaking This third edition reviews the new knowledge which has become available in the last 10 years and considers how the global trends of increased availability and wider range of fermented products around the world impact on current and future technological challenges for bakers Stanley P Cauvain is the Director and Vice President of Research and Development activities at BakeTran and Professor at the International Institute of Agri Food Security Curtin University Perth Western Australia *Handbook on Sourdough Biotechnology* Marco Gobbetti,Michael Gänzle,2012-12-12 In the last few decades many efforts have been made to exploit sourdough s potential for making baked goods Through the biotechnology of this traditional baking method many sensory rheological nutritional and shelf life properties have been discovered and or rediscovered Bakery industries are greatly attracted by the potentials that sourdough presents and new industrial protocols are being developed To the best of our knowledge there has been no single book dedicated to sourdough biotechnology and which clearly demonstrate its potential This book aims at defining and highlighting the microbiological technological nutritional and chemical aspects of sourdough biotechnology The book will be the first reference guide on this topic for the worldwide scientific teaching and students communities also opening a way of communication and transferring the main results to a more productive industrial application **Bakery Products Science and Technology** Weibiao Zhou,Y. H. Hui,2014-08-11 Baking is a process that has been practiced for centuries and bakery products range in complexity from the simple ingredients of a plain pastry to the numerous components of a cake While currently there are many books available aimed at food service operators culinary art instruction and consumers relatively few professional publications exist that cover the science and technology of baking In this book professionals from industry government and academia contribute their perspectives on the state of industrial baking today The second edition of this successful and comprehensive overview of bakery science is revised and expanded featuring chapters on various bread and non bread products from around the world as well as nutrition and packaging processing quality control global bread varieties and other popular bakery products The book is structured to follow the baking process from the basics flour and other ingredients to mixing proofing and baking Blending the technical aspects of baking with the latest scientific research Bakery Products Science and Technology Second

Edition has all the finest ingredients to serve the most demanding appetites of food science professionals researchers and students *Bakery Food Manufacture and Quality* Stanley P. Cauvain,Linda S. Young,2009-01-21 Water is the major contributor to the eating and keeping qualities and structure of baked products Its management and control during preparation processing baking cooling and storage is essential for the optimisation of product quality This successful and highly practical volume describes in detail the role and control of water in the formation of cake batters bread pastry and biscuit doughs their subsequent processing and the baked product Now in a fully revised and updated second edition the book has been expanded and developed through the inclusion of new information and references related to the formation and processing of batters and dough into baked products The new edition includes a selection of case studies based on practical experience in the manufacture and optimisation of baked products Each case study illustrated as appropriate considers the various roles that water may play in different manufacturing contexts The book is aimed at food scientists and technologists in bakery companies ingredient suppliers flour millers researchers and students in academic food science departments
