Basic In Action

R. Tuomela

Basic In Action:

Action and Responsibility Andrew Sneddon, 2006-01-27 This book is an exploration of what it takes for an event to count as an action I first became interested in this topic nearly a decade ago while working on a different topic I kept coming across philosophers making claims about the nature of action that seemed false or at least dubious to me As a consequence I turned to the philosophy of action directly to get to the heart of the matter I have wrestled with this territory ever since I hope that with this book I have finally earned the intuitions that put me at odds with the philosophers I was originally reading This book develops ideas in Part Two of my doctoral dissertation which I wrote at Queen s University in Kingston Ontario Canada I loved being at Queen s for both professional and personal reasons My thanks go to the Social Sciences and Humanities Research Council of Canada for financial support as a doctoral candidate Steve Leighton and Ronald de Sousa were readers for my dissertation They provided some early and invaluable challenges to the ideas developed here My deepest debt of gratitude is owed to David Bakhurst my supervisor I learned a lot from David this book would not be the same without his help

Human Action and Its Explanation R. Tuomela, 2012-12-06 This book presents a unified and systematic philosophical account of human actions and their explanation and it does it in the spirit of scientific realism In addition various other related topics such as psychological concept formation and the nature of mental events and states are discussed This is due to the fact that the key problems in the philosophy of psychology are interconnected to a high degree This interwovenness has affected the discussion of these problems in that often the same topic is discussed in several contexts in the book I hope the reader does not find this too frustrating The theory of action developed in this book especially in its latter half is a causalist one In a sense it can be regarded as an explication and refinement of a typical common sense view of actions and the mental episodes causally responsible for them It has of course not been possible to discuss all the relevant philosophical problems in great detail even if I have regarded it as necessary to give a brief treatment of relatively many problems Rather I have concentrated on some key issues and hope that future research will help to clarify the rest

Practical Knowledge Kieran Setiya, 2016-09-20 In the last forty years action theory has revitalized moral philosophy Philosophers have explored the nature of agency what is involved in acting for a reason how we know what we are doing the role of intention desire and belief in motivating action and more At their most ambitious philosophers have claimed that action theory is the foundation of ethics For rationalists or constitutivists the standards of practical reason derive from the nature of agency as a functional or teleological kind They are no more mysterious than the standards for being a good clock or a good heart given the function of clocks and hearts In this collection of new and previously published essays Kieran Setiya defends a causal theory of intentional action on which it is explained by knowledge in intention a form of practical knowledge that transcends prior evidence Such knowledge rests on knowing how to do the things we do The theory is otherwise minimalist agents need not regard their reasons as good put means to ends or adopt particular aims It follows that

we must reject the rationalist or constitutivist approach the nature of agency is too thin to support the standards of practical reason But the upshot is not nihilism Instead the requirement of means end coherence is explained by the cognitive aspect of intention and the standards of practical reason are those of ethical virtue applied to practical thought **American Machinist**, 1926 **Religion, Reality, and a Good Life** Eberhard Herrmann, 2004 Do we have access to reality as it is conceptualized by us Against metaphysical realism and postmodern relativism Eberhard Herrmann develops a pragmatic realism It stresses reality as conceptualized reality while at the same time not ruling out objectivity Contents include The Nature of the Enquiry The Philosophical Problem Formulated Religion and Philosophy Philosophy Reasons for and Against Metaphysical Realism Critique of Semantic Realism Pragmatic Realism Realism from an Internal Perspective Religious Metaphysical Realism Religious Metaphysical Anti Realism Religious Statements as Purported Assertions Christian Theism The Character of Religious Utterances Pragmatic Realism The Function of Religion Two Material Definitions of Truth Perspectives on Views of Life The Role of the Emotions in Our Conception of Reality Emotions and the Conceptualization of Values **India Rubber World**, 1921 Journal of the American Medical Association American Medical Association, 1915 Foundry, 1924 **New York Supreme Court**, *Journal of the Society of Dyers and Colourists* Society of Dyers and Colourists, 1890 *Journal of the Chemical Society* Chemical Society (Great Britain), 1882 Titles of chemical papers in British and foreign journals included in Quarterly journal v 1 12 California.
