In addition nine major entries cover each of the major disciplines: political economy, management and business, human geography, politics, sociology, law, psychology, organizational behavior and the history and development of the social sciences in a broader sense.

Basic Research Methods Gerard Guthrie, 2010-07-14. This book offers a comprehensive and rounded view of research as a tool for logical problem solving. It is built on the philosophical/pragmatic foundation that the value of knowledge and research methodologies lies in their usefulness in engaging with the real world. Synthesizing both positivist and non positivist methodologies, this book is for students who are undertaking their first social science research course or their first research project. The techniques are basic ones but many masters and doctoral research studies use them. From an experiential base, students would be able to build a more advanced conceptual and theoretical understanding of research through further reading and practice.

Research Methodology In Social Sciences Shridhar Patil, Aditya, 2016-02-05. The book clearly illustrates the fundamental concepts related to the aspect of social research in the context of Extension Education. The book is divided into 4 parts. Foundations of social research deals with universal and basic units of social research like scientific approach, meaning, process and development of scientific research problem. It also deals with defining and measurement of variables and testing of reliability and validity of measuring instruments. Research Methods section deals with the three major research methods used in extension education: Agricultural extension, namely Survey research, Action research and case study. This section discusses in detail the process, relative advantages and limitations of each of these three methods. There are numerous research methods used in social research. Tools and techniques of data collection deals with situation suitability, relative advantages and limitation of various data collection techniques like face to face interview, mailed questionnaire, observation method, content analysis, sociometry and projective methods. Data processing and report writing section deals with making the collected data amenable for statistical analysis, i.e. coding. This section discusses in detail the various types of codes and their utility. It also deals with formulation and testing of hypothesis and writing of the research report.
