

Cracking the language code: **SPANISH**

Ordinarily the teaching of a foreign language assumes a need to learn thousands of facts... Dr. Stanley Hurdle holds that European languages can be treated as dialects of English, and knowledge of each depends on fewer than 100 facts. Thus learning a foreign language becomes the easiest thing in a multilingual world. I now suspect, after studying Hurdle's approach and method for many weeks, that they could enable you to learn to read and understand foreign languages... with an insight and with an economy of time that are quite possibly unprecedented.
