Controversies in Neurosurgery II Ossama Al-Mefty, 2013-10-15 *Controversies in Neurosurgery II* reflects real world situations where multiple treatment options are often considered for difficult neurosurgical cases. Each chapter begins with an opening case in which experts describe the pros and cons of different treatment methodologies and operative techniques helping neurosurgeons select the best treatment plan for individual patients in their practice. It is informed with the expertise of more than 100 of the world's preeminent neurosurgeons. Key features: Experts from all over the world offer their opinions on more than 20 controversial hot topics in neurosurgery including a discussion about whether transcranial or endoscopic approaches are the better option for resecting colloid cysts and a lively debate about the optimal treatment of giant ophthalmic artery aneurysms. All treatment options are presented concisely in one volume so that neurosurgeons don't have to spend time consulting other sources. The moderators' conclusion at the end of each chapter explains the scientific evidence about the case and synthesizes the views presented. *Controversies in Neurosurgery II* will be treasured by neurosurgeons and neurosurgery residents as well as by neurologists and neuroradiologists and will be a key volume in their medical libraries for years to come.
