provides an answer to the question of why in the face of all the modern technology we have for saving time Americans still spend time in their kitchens cooking Americans eat four to five meals per week in a restaurant and buy millions of dollars worth of convenience foods Cooking especially from scratch is clearly on its way out However if this is true why do we spend so much money on kitchen appliances both large and small Why are so many cooking shows and cookbooks published each year if so few people actually cook In *American Home Cooking* Timothy Miller argues that there are historical reasons behind the reality of American cooking There are some factors that over the past two hundred years have kept us close to our kitchens while there are other factors that have worked to push us away from our kitchens At one end of the cooking and eating continuum is preparing meals from scratch all ingredients are raw and unprocessed and in extreme cases grown at the home On the other end of the spectrum is dining out at a restaurant where no cooking is done but the family is still fed All dining experiences exist along this continuum and Miller considers how American dining has moved along the continuum He looks at a number of different groups and trends that have affected the state of the American kitchen stretching back to the early 1800s These include food and appliance companies the restaurant industry the home economics movement of the early 20th century and reform movements such as the counterculture of the 1960s and the religious reform movements of the 1800s And yet the kitchen is still most often the center of the home and the place where most people expect to cook and eat even if they don't

Transactions in Taste Manpreet Janeja, 2020-11-29 In a radical departure from previous ethnographies of food this book asks how and why food is pivotal to social relations and forms of identity that emerge as normal and not normal It does so by describing the production consumption distribution and disposal of normal Bengali food in middle class households that employ cooks from poor classes and in Bengali restaurants in contemporary Calcutta India and Dhaka Bangladesh In a rare comparative foray into Bengali Hindu and Muslim food ways on both sides of the border the book includes addas idle talk and interviews with both men and women It initiates a dialogue that links issues of agency place hospitality and ownership with a new field that places food as an artefact at the centre of its inquiry It invites the reader throughout to approach food afresh as the key that unlocks the complexities of what is mundane yet profound the everyday The book thus analyses the constant and fraught negotiations that feed into definitions of normality class and identity in the deeply intimate yet intensely public domain of food Food transactions here provide a window into shifting configurations of trust power and conflict integral to social relationships shaped by events such as the 1943-44 Bengal famine the 1947 partition of India and the 1971 Bangladesh War
