Critical Study In Method:

Research Methods Ronald C. Martella, J. Ronald Nelson, Nancy E. Marchand-Martella, 1999 Research Methods thoroughly covers both quantitative and qualitative oriented research Unlike many texts which begin with an introduction to research and then move directly to how to conduct research this text develops critical thinking skills about research and is designed to produce knowledgeable and informed critical research consumers Each chapter builds on the information in preceding ones to focus on the importance of research methodology and interpretation rather than many competitors traditional coverage of statistical calculations and analyses The thorough and extensive coverage of all research methods combined with a focus on critical thinking makes this text truly unique

Analysis of Human Fecal Components and Study of Methods for Their Recovery in Space Systems Samuel A. Goldblith, Emily L. Wick, 1961 Human fecal constituents were investigated for possible use in waste recovery systems aboard a space vehicle during a journey of long duration 1 3 months It was necessary to first isolate them and then to evaluate their potential usefulness A review of literature indicated that there is incomplete knowledge of human fecal components that detailed knowledge of the chemical nature of only a small proportion of fecal components exists and that these have rarely been isolated in any quantity However protein minerals and trace elements present in feces are possibly useful materials Investigation indicated that use of fecal protein or its component amino acids as nutrients for man would require supplementation of the diet A number of minerals were isolated If found to have nutritional value feces could possibly serve as an available source of supply Insufficient information e g authentic space diets and identification of useful fecal components exists to compare or recommend feasible methods for recovery
