Sullivan, 2007-11-12 Research from across the social sciences is converging on cooperation as a key factor in human functioning Written by esteemed political scientists and psychologists this volume brings together political scientists and psychologists to identify and analyze recent social scientific research on cooperation and present an overview of current knowledge about its causes and consequences at the individual and group level Illuminates the importance of cooperation in promoting healthy well functioning individuals and groups Addresses the question of how cooperation research can be applied to solve real world problems Explores sources of cooperative behaviors and the consequences of cooperative experiences Provides a synthesis for experts an overview for novices and a survey of current research for policy makers *The Realities of Partnership at Work* Martin Upchurch, 2008-11-05 The realities of partnership at work finds evidence of work intensification increased stress and more job insecurity where partnership has been introduced in the workplace This definitive study written by leading authors in the field suggests that partnership is a utopian Third Way project designed to suppress and deny workplace conflict The concept of good partnership following the TUCs six principles of partnership is probed and tested and found to fall short of employees and unions expectations

Government and employer efforts to use workplace consensus as a vehicle for productivity growth inevitably exacerbate the tensions between worker and employer interest making prospects for mutual gains illusory Research for this book was funded by the ESRC Future of Work Programme and it includes extensive surveys and interviews in organizations from finance aerospace and the public sector Few subjects could be judged more vital to current policy debates than the prospects for work and employment The Future of Work series edited by Professor Peter Nolan Director of the ESRC Future of Work Programme provides the much needed evidence and theoretical advances to enhance our understanding of the critical developments most likely to impact on people s working lives
