Critical Act:

Representing Women? Mercedes Mateo Diaz, 2024-10-31 This work discusses questions on political participation representation and legitimacy in the European Union national parliaments Three major empirical questions structure the book What affects women's presence in parliaments Does the number of women in parliament have an effect And are women in parliament representing women Empirical evidences show that institutional reforms need a minimal environment in terms of socio economic development so as to prove effective As opposed to the critical mass theory claiming that a few representatives cannot have an impact on the political outcomes here the empirical evidences suggest that smaller groups can also influence the different components of the legislative process The last part turns to the fundamental question of whether a parliament that is descriptively representative i e in which the parliamentarians share certain characteristics with the voters also is a substantively descriptive parliament i e in which the parliamentarians mirror the voters opinions Evidence suggests that the electoral system's level of proportionality influences the extent to which assemblies socially and ideologically mirror their population The book ends by advancing new hypotheses and setting up guidelines for future research

Gender, Peace and Conflict Inger Skjelsboek, Dan Smith, 2001-02-01 What impact does gender difference make to political decision making Will the political empowerment of women contribute to a more peaceful world The role of gender has been increasingly recognized as central to the study and analysis of the traditionally male domains of war and international relations This book explores the key role of gender in peace research conflict resolution and international politics Rather than simply add gender the aim is to transcend different disciplinary boundaries and conceptual approaches to provide a more integrated basis for future study To this end it uniquely combines theoretical chapters alongside empirical case studies to demonstrate the importance of a gender perspective to both theory and practice in conflict resolution and peace research The theoretical chapters explore the gender relationship and engage with the many stereotypical dichotomies like femininity and peace and masculinity and war The case study chapters drawing on examples from South America South Asia and Europe including former Yugoslavia move beyond theoretical critique to focus on issues like sexual violence in war the role of women in military groups and peacekeeping operations and the impact of a critical mass of women in political decision making Gender Peace and Conflict will provide an invaluable survey and new insights to a central area of contemporary research It will be essential reading for academics students and practitioners across peace studies conflict resolution and international politics

Dialogue and Learning in Mathematics

Education Helle Alrø, Ole Skovsmose, 2002 Dialogue and Learning in Mathematics Education is concerned with communication in mathematics class rooms In a series of empirical studies of project work we follow students inquiry cooperation as well as students obstructions to inquiry cooperation Both are considered important for a theory of learning mathematics Special attention is paid to the notions of dialogue and critique A central idea is that dialogue supports critical learning of mathematics The link between dialogue and critique is developed further by including the notions of intention and reflection Thus a theory of learning mathematics is developed which is resonant with critical mathematics education
